EDUCATION

University of Waterloo

Sep 2023 - Present

Bachelor of Computer Science, Artificial Intelligence Specialization, Honours Co-op Program

GPA: 3.8/4.0

SKILLS

- Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL, PHP, HTML/CSS, Bash
- Frameworks/Libraries: React, jQuery, MUI, Tailwind CSS, Bootstrap, Selenium, PHPUnit, Symfony, Doctrine
- Developer Tools: GitHub/Git, Sourcetree, VS Code, PostgreSQL, Firebase, pgAdmin, Figma, Jira, Confluence

EXPERIENCE

Polaris Intelligence

May 2024 - Aug 2024

Software QA Developer (Co-op)

Toronto, Ontario

- Pioneered the implementation of **PHPUnit testing**, integrating **150+** functional tests for backend Symfony controller endpoints and DOM crawler testing to save the team **3+** hours per week using PHP, PHPUnit, and the Doctrine ORM
- Increased automated test coverage by ~10% with Selenium regression and smoke tests, reducing manual testing efforts
- Developed and updated React components with CSS and jQuery to update PHP Twig templates, enhancing UI
- Utilized SQL to rigorously test WebSocket connections, optimize database storage and query performance, and conduct security tests to prevent SQL injection attacks
- Identified and thoroughly documented 200+ bugs in Jira, streamlining resolution processes to enhance product quality

SlimeScholars Dec 2023 – April 2024

Front-End Developer

Waterloo, Ontario

- <u>SlimeScholars</u> is a startup by University of Waterloo students that aims to gamify primary/secondary education
- Revamped the gameplay tutorial system UI and content using 10+ Figma designs and modified the backend tutorial model to enhance reusability, optimizing maintenance efficiency
- Created 3 dynamic webpages and 15+ reusable React components using TailwindCSS, enhancing UI consistency

Scarborough Toyota Jul 2022 – Aug 2022

Automotive Technician

Toronto, Ontario

- Provided service and repairs for 400+ varying vehicles, including 10+ car engine and differential repairs
- Ensured client and customer satisfaction by consistently delivering high-quality service in ECU software updates, brake servicing, oil changes, car calibration, installations, and PDIs

PROJECTS

Verbalyst | O

- Received "Best Web Award" and \$2750 in prizes out of 700+ other hackers in Ignition Hacks v.3 for Verbalyst
- Designed a multi-faceted, interactive front-end by utilizing Bootstrap, Flowbite components and TailwindCSS classes
- Developed layered functionality by employing JavaScript for audio and camera recording and harnessing AssemblyAI for precise audio-to-text transcription
- Leveraged Google Vertex AI's language learning model PaLM-2 Chat-Bison 001 to provide insightful feedback of the transcription through prompt engineering, and established connectivity from back-end to front-end using Flask

AtTune | O

- Placed **12th** in RecessHacks 3.0 out of **300+** participants with AtTune, a website created to return the user a playlist of songs that match the user's inputted emotion
- Used Flask and Python to integrate the Spotify Web API into the back-end alongside Bootstrap and HTML/CSS for a
 polished and theme-appropriate front-end
